

power for people
in lebanon

Reducing poverty, Giving hope

Why we exist

We believe that the supply of basic needs like affordable clean energy, clean water and sanitation contribute to the solution of many problems in Lebanon. Through a huge number of small scale projects targeting the areas of energy, environment, community, water, solar and education, we want to help people in Lebanon now while contributing to a better future.

Our vision:

To reduce poverty
of people in
Lebanon through
affordable
and clean water &
energy

We are driven by a desire to help people in Lebanon. We believe that water treatment to provide quality drinking water combined with clean energy can contribute to short-term relief and be a key driver for a better environment in Lebanon in the long run. We aspire to reduce suffering and provide clean water with clean energy through tangible projects that reach people directly.

The purpose of the association is the support of people in need, social and educational institutions or associations and financially weak communities in Lebanon. Beyond the direct aid, through our initiative and projects we hope to plant seeds for economic and social development.

Our team

„Our individual quality of life depends primarily on us and on our supporters.“

Barbara Frei Founding Member

„If you change nothing, nothing changes.“

Jean Abed Founding Member

„Never stop believing, never give up.“

Mustapha Mikati Founding Member

At Power for People in Lebanon, we are diverse by definition: we are an apolitical intergenerational, intercultural and cross-sectoral association. As non-profit association, Power for People in Lebanon depends on people who invest their energy, know-how & money to reduce the suffering in Lebanon. This is why we are thankful and appreciate the contributions of each donor, each member and especially our active team that makes this vision come true.
